(54) HEALTH INFORMATION COLLECTING DEVICE FOR CELLULAR TELEPHONE SET

(57)Abstract:

PROBLEM TO BE SOLVED: To solve the problem of a health information collecting and management system being subjected to restrictions on installation and operability, because health measurement equipment and a home health management terminal which are installed and used at different places in many cases intrinsically having to be installed so close.

SOLUTION: A health information collecting device for a cellular telephone set is provided with a health information input section 42 for inputting health information from a health measurement device by a wireless means, an access information storage section 43 for storing access information for using a specified network service, a cellular telephone information input/output section for outputting the health information and the access information into a cellular telephone set, and a control section 45 for controlling the sections 42, 43 and 44. The health information collecting device is connected to the cellular telephone set. In this way, a specific home health management terminal is not needed, and operations can be simplified, without impairing convenience of the cellular telephone set.
